

eTurns TrackStock Optimize

Mobile app with analytics for optimizing stockrooms and truck inventory

eTurns TrackStock Optimize includes all the benefits of TrackStock Replenish and TrackStock Manage plus the ability to use our Min/Max Tuning Dashboard Analytics to optimize inventory levels which saves cash and eliminates stockouts. It also offers kitting, tool/asset management, project spend limits and requisitions.

eTurns TrackStock offers 3 levels of automated replenishment

TRACKSTOCK REPLENISH

Scan barcodes to reorder or count

TRACKSTOCK MANAGE

Track usage. Know quantity on hand.

TRACKSTOCK OPTIMIZE

Optimize point-of-use inventories using analytics

Mobile App (IOS, Android)

Includes:

- Unlimited users, items, suppliers
- Simple reporting
- Barcode label designer
- QuickBooks integration
- Certification: SOC II Type 2
- User permissions
- Audit trail
- Easily upgrade to TrackStock Manage or Optimize

Benefits:

- 10x faster than e-commerce
- Decrease errors, stockouts, overstock
- 1 app to reorder from any supplier
- Reduce PO costs by up to 90%

Mobile App

Includes everything in **Replenish**, plus:

- Track usage, jobs, orders, receives and quantity on hand
- Work order signature and image capture
- Advanced reporting: customize and schedule 83 reports
- Quick Lists, transfers, staging, serial #s, lot #/dates
- Alerts Dashboard with analytics

All the benefits of **Replenish**, plus:

- Real-time visibility of on-hand status
- Collect AR faster with job photos
- Use consigned inventory
- Be proactive with email alerts

Mobile App, RFID, SensorBins

Includes everything in **Manage**, plus:

- Min/Max Tuning Dashboard: calculates what each item's Min/Max should be based on recent usage, then quantifies cash savings and reduced carrying costs
- Kitting
- Requisitions
- Project spend limits
- Tool crib management
- Asset maintenance tracking

All the benefits of **Manage**, plus:

- Reduce inventory and costs up to 73%
- Analytics show potential cash savings

Get analytics to optimize inventories and save cash

Scan items as they are used. The app records the usage and continually compares the quantity on hand with the minimum, and triggers an automated order up to the maximum. Use the eTurns Min/Max Tuning Dashboard to learn how much cash can be taken out of inventory, which results in one time savings as well as annual savings from reduced inventory carrying costs.

Use TrackStock SensorBins for fully automated “no-touch” replenishment

TrackStock SensorBins perform a complete physical inventory of all the items on the system twice a day then determine the quantity on hand of each item and compare that to the minimum to create a suggested order if necessary. Can be used to calculate consigned usage, eliminating the need for onsite counts.

Use RFID to automate Kanban 2-bin replenishment

Scan empty bins past an RFID tower to trigger replenishment.

Optimize consigned inventory with ease

TrackStock Optimize works for consigned or customer-owned inventories. The app captures all usage transactions, allowing the distributor to replenish based on customer usage, and to provide consolidated invoices to customers.

Manage kitting and subassemblies

Know exactly how many of any kit can be built with the components in inventory thanks to real-time visibility. Assign serial numbers to kits. Use kit min/max levels to properly reflect component demand. Break kits to return components back to general inventory if needed. Manage component on-hand quantity, serial numbers, work-in-process and completed kit inventory.

Get email alerts with 83 customizable reports, such as:

- Email alerts to order/requisition approvers can be approved/rejected in the email
- Reports about new and current orders to suppliers
- Reports about item usage, turns, tool cribs, upcoming asset maintenance

Free 30-Day Trial. Very simple setup.

- Fill out our form with: list of items, name and address of stockroom
- We'll set things up and send barcode labels
- Download the app from Apple or Google Play
- Scan to order, count, use or receive
- Enjoy our free 30-day trial with training and support

Testimonials

eTurns is the proven leader in automated replenishment of stockrooms and trucks. We have more than 1,700 customers, including: Anixter, Graybar, Gexpro, Rexel, Tesla, SpaceX, Cisco, Intel, Rolls Royce, Shell, Northrop Grumman, General Atomics, Siemens, University of California at Davis, Ambulnz, Smilebuilderz, FastMD and others.

“eTurns has live capture of parts usage, unlike our JD Edwards ERP. With eTurns on our 75 service trucks, we decreased line items from 315 to 170 and inventory from \$20k to \$14k on each truck. eTurns helped bring our carrying costs from \$1.6M to \$875K, for a savings of \$725,000 a year. We reduced our 8 people in procurement to 3 and redeployed those people to dispatch and customer service.”

—Carlos Echazabal, Sr. Director of Operations, Service America

“If the customer didn't have eTurns, we could not control the consigned inventory at the customer's location. eTurns provides a great way to record the parts the customer used so we can bill them. Without it, we would have a lot more confusion and negotiations with customers.”

—Ignacio Valdes, Supply Chain Manager, Anixter

“We were using a manual process... The value of our inventory on hand was north of \$75,000 when we started using eTurns; now we have around \$20,000 sitting on the shelves. The drain on my time has been significantly reduced and continues to improve.”

—Brian Galowitz, Manager, Lakes Region EMS
