

eTurns TrackStock Overview

Do VMI orders or cycle counts 10x faster

TrackStock is faster than spreadsheets, clipboards, and eCommerce sites for VMI replenishment. Scan items to order or count. The app uses min/max settings to auto-replenish up to the maximum.

Do CMI orders, counts, and usage tracking more easily with a self-service CMI scanning app

Companies who want to control their own replenishment can use TrackStock for orders, cycle counts, and pulls that track item usage and trigger replenishment orders with min/max settings.

Reduce procurement costs by 90%

TrackStock sends automated orders when replenishment is triggered by min/max levels, preventing the need to type in POs, which reduces procurement labor for distributors and their customers. Quickbooks integration is available.

Capture with one scan:

customer name, item number, location, package quantity, supplier, etc.

Get AI analytics to optimize inventory levels and save cash

After tracking usage regularly, the TrackStock AI Min/Max Dashboard displays what current and optimal inventory levels are as well as how much the company can save by moving min/max settings to optimal levels.

Customize and schedule email alerts for over 80 reports, such as:

- Reports to order approvers that include the list of items being ordered that need to be approved. Approve/reject button included in the email.
- Reports about current orders to suppliers
- Reports about item usage and inventory turns

Use eLabels, SensorBins or RFID digital kanban

TrackStock offers cutting-edge technology for easy auto-replenishment. With eLabels, you simply push a button to send a digital replenishment order to any distributor. SensorBins offer "no-touch" weight scale replenishment. With RFID, you scan an empty bin past an RFID tower to trigger reorders.

Testimonials

"In the past, I spent at least two hours a day personally counting materials for the next day's jobs. With eTurns it only takes me 5 minutes every two weeks — it gives me data on usage, quantity on hand, min/max levels and much more. And I like the ease-of-use."

—Jason Barron, Field Operations Manager, M&L Electrical

"eTurns has live capture of parts usage. With eTurns on our 75 service trucks, we decreased line items from 315 to 170 and inventory from \$20k to \$14k on each truck. eTurns helped bring our carrying costs from \$1.6M to \$875K, for a savings of \$725,000 a year. We reduced our 8 people in procurement to 3 and redeployed those people to dispatch and customer service."

—Carlos Echazabal, Sr. Director of Operations, Service America

Free 30-day trial with training and support. Simple setup.

- ✓ Sign up at www.eturns.com
- ✓ Upload your item list and the name/address of your rooms/trucks
