BORDER STATES VMI

Border States VMI
Overview

VMI/CMI app for tracking usage, auto-replenishing, and optimizing stockroom inventory

Border States VMI is inventory tracking and auto-replenishment software for stockrooms, jobsites, and service trucks. Using scans and sensors, it orders, cycle counts, receives, pulls, transfers, and tracks usage of inventory, triggering auto-replenishment orders via min/max levels sent to any supplier. Its Min/Max Tuning AI Dashboard helps you optimize inventory and save costs across every point-of-use location.

Border States VMI offers 4 levels of automated replenishment

BORDER STATES VMI REPLENISH

- ✓ Scan barcodes to order or count
- ✓ Unlimited users, items, suppliers
- ✓ Barcode label designer
- ✓ Certification: SOC II Type 2
- ✓ User permissions

BORDER STATES VMI

Border States VMI

Overview

Do VMI orders or cycle counts 10x faster

Border States VMI is faster than spreadsheets, clipboards, and eCommerce sites for VMI replenishment. Scan items to order or count. The app uses min/max settings to auto-replenish up to the maximum.

Do CMI orders, counts, and usage tracking more easily with a self-service CMI scanning app

Companies who want to control their own replenishment can use Border States VMI for orders, cycle counts, and pulls that track item usage and trigger replenishment orders with min/max settings.

Reduce procurement costs by 90%

Border States VMI sends automated orders when replenishment is triggered by min/max levels, preventing the need to type in POs, which reduces procurement labor for distributors and their customers. Quickbooks integration is available.

Capture with one scan:

Customer name, item number, location, package quantity, supplier, etc.

Get AI analytics to optimize inventory levels and save cash

After tracking usage regularly, the Border States VMI AI Min/ Max Dashboard displays what current and optimal inventory levels are as well as how much the company can save by moving min/max settings to optimal levels.

Customize and schedule email alerts for over 80 reports, such as:

- Reports to order approvers that include the list of items being ordered that need to be approved. Approve/reject button included in the email.
- Reports about current orders to suppliers
- Reports about item usage and inventory turns

Use eLabels, SensorBins or RFID digital kanban

Border States VMI offers cutting-edge technology for easy auto-replenishment. With eLabels, you simply push a button to send a digital replenishment order to any distributor. SensorBins offer "no-touch" weight scale replenishment. With RFID, you scan an empty bin past an RFID tower to trigger reorders.

Testimonials

"In the past, I spent at least two hours a day personally counting materials for the next day's jobs. With this VMI app it only takes me 5 minutes every two weeks — it gives me data on usage, quantity on hand, min/max levels and much more. And I like the ease-of-use."

—Jason Barron, Field Operations Manager, M&L Electrical

"This VMI app has live capture of parts usage. With this VMI app on our 75 service trucks, we decreased line items from 315 to 170 and inventory from $20k to $14k on each truck. It helped bring our carrying costs from $1.6M to $875K, for a savings of $725,000 a year. We reduced our 8 people in procurement to 3 and redeployed those people to dispatch and customer service."

—Carlos Echazabal, Sr. Director of Operations, Service America

Get started with Border States VMI

- ✓ Talk to your Border States account rep about Border States VMI
- ✓ We'll help you set up your item list and the name/address of your rooms/trucks
