

eTurns TrackStock for Contractors

A VMI/CMI App for Contractors Who
Want Data-driven Replenishment

Building AI Data Centers or Other Large Projects? Here's How Contractors & Distributors Protect Profitability With Data-Driven VMI

When work is abundant, no one slows down to optimize. When things tighten, no one wants to spend money to save money. Somewhere in that chaos, profitability erodes. But every dollar saved on inventory is worth seven to ten dollars of revenue.

That's why a data-driven Vendor-Managed Inventory (VMI) app like eTurns TrackStock has become one of the most powerful profit tools on a modern jobsite.

TrackStock's scanning app and sensors help you order, count, receive, pull, transfer, and track usage of consigned or contractor-owned inventory. It uses min/max levels to trigger auto-replenishment orders that are sent to suppliers and keeps your inventory dynamically optimized.

CONSIGNED CONEX TRAILERS	DATA-DRIVEN REPLENISHMENT	AUTOMATED JOB COSTING	TOOLS + ASSET TRACKING
<p>Reduce capital outlay. Increase visibility.</p> <ul style="list-style-type: none"> ✓ Distributor drops a stocked conex on site ✓ Contractor pays only when items are used ✓ Live tracking in under 30 minutes ✓ Full credit on unused returns ✓ Automated replenishment and consolidated billing <p>Why it matters</p> <ul style="list-style-type: none"> ✓ You only pay for what you use ✓ No "mystery shrinkage" ✓ Auto-replenishment, no stockouts 	<p>Good min/max beats human intuition.</p> <ul style="list-style-type: none"> ✓ Scan usage as it happens ✓ App triggers auto-replenishment ✓ Min/max levels optimize from real history ✓ See over-ordering, spikes, and waste ✓ Reduce carrying costs without risk <p>Result</p> <ul style="list-style-type: none"> ✓ Fewer emergency runs ✓ Lower capital tied up ✓ Cleaner distributor routes 	<p>Every Work Order pull is attributed instantly.</p> <ul style="list-style-type: none"> ✓ Assign items pulled to: <ul style="list-style-type: none"> • Contractor • Zone • Phase • Cost code • Room ✓ Pushes directly into ERP and invoices ✓ No re-entry, no error ✓ Assign items to multiple contractors on same jobsite <p>Impact</p> <ul style="list-style-type: none"> ✓ Clean billing ✓ Accurate project margins ✓ End "where did that go?" 	<p>Reduce tool crib shrinkage.</p> <ul style="list-style-type: none"> ✓ Scan tools to people or crews ✓ See who had what ✓ Enforce maintenance schedules ✓ Track calibration and repairs <p>Outcome</p> <ul style="list-style-type: none"> ✓ Less downtime ✓ Fewer losses ✓ Faster crews

eTurns TrackStock Benefits

A VMI/CMI App for Contractors Who
Want Data-driven Replenishment

Do VMI orders and cycle counts 10x faster

TrackStock replaces spreadsheets, clipboards, and guesswork. Crews scan items to order or count. The app auto-replenishes to optimized levels. No typing. No lag. No friction.

Control contractor-owned material with precision

Most "VMI" still relies on eyeballing shelves. That's the most expensive replenishment method on Earth.

With TrackStock CMI, contractors:

- Scan usage in real time
- Trigger replenishment automatically
- Maintain optimized min/max levels

Job costing that happens automatically

- Every Work Order "pull" can be assigned to a floor, contractor, phase, cost code, or room. TrackStock pushes that data into your ERP. No spreadsheets needed.
- For lot-numbered cable reels, TrackStock deducts footage by job, ensuring every pull is accounted for.

Keep inventory optimized

TrackStock's Min/Max AI Dashboard shows:

- Where you're over-ordering
- Which items spike
- Which tie up capital
- How much you can save

Get customizable reports

- Customize and schedule email alerts for over 80 reports
- Get reports to approvers with approve/reject button in the email
- Get reports about current orders, usage, turns, etc.

Replenish with advanced VMI technologies

- Push button eLabels send a digital replenishment order to any distributor
- RFID digital kanban lets you put a bin in a box to trigger reorders
- SensorBins offer "no touch" auto-replenishment with weight scales

Sync warehouse, jobsite, and truck inventory

TrackStock eliminates the blind spots between:

- Warehouse
- Jobsite
- Trucks

And for wire and cable management, distance-marked reels update quantity-on-hand automatically. No "phantom reels."

No duplicate buying. No guessing what's in the field.

Free 30-day trial with training and support. Simple setup.

- ✓ Sign up at www.eturns.com
- ✓ Upload your item list and the name/address of your rooms/trucks
- ✓ Apply our QR code labels to your bins or shelves
- ✓ Download the eTurns TrackStock app from the App Store or Google Play
- ✓ Start scanning to order, count or use inventory to trigger replenishment

Testimonials

"I don't see how you could track consignment inventory with any degree of accuracy and ease without the eTurns VMI app."

— Jason Barron, Field Operations Manager, M&L Electrical (contractor)

"Managing our replenishment with eTurns' min/max settings has helped us a lot—it keeps us from ordering too much or stocking out. It spits out reports telling us what we need and don't need. Using eTurns has saved us around 5–6% on \$15 million in inventory—that's an ROI of over 3,800%."

— Anthony Johnson, The Katy Plumbing Company
